Where is the projector located? Is it obvious? The projector is fixed within the council chamber but the vga cable is accessible from the platform

Is the standard VGA cable provided? There is a vga connector in a white block that is to be used not the brass metal ones. Bring a vga cable with you

Is there a nearby power supply for the laptop? There is a power source close by.

Is there a remote control available? There is a remote for the projector/screen only

Is there anything else I need to know? IT helpdesk on 6270 in case of issues
